the microscope

1984 VOLUME 32

Editor: Walter C. McCrone

Published by
Microscope Publications
Chicago

The Microscope

SUBJECT INDEX

Volume 32

Argon-ion lasers, 69
Aroclor, 148, 277

Birefringence, 11
Botanical microscopy, 23

Capillaries, rectangular, 60
Cell walls, 83
Cement, 265
Chemical microscopy, 141
Comparison microscope, 29
Cooking, 123
Corn starch, 123
Criminalistics, 1, 29, 64, 65

Dehydration, 83
Diatoms, 151
Differential interference contrast, 63
Diffraction gratings, 93
Dispersion (of refracxtive index), 11
Dithio-oxamide, 141

EDX, 265
Electrically-coated slide, 100
Embedding, 83
Energy-dispersive x-ray analysis, 265

Fibers, 11
Filtering optical images, 119
Food emulsions, 133
Food microscopy, 133
Food processing, 123
Forensic microscopy, 29
Fossil wood, 23
Fractography, 219

Glass surface topography, 1
Gratings, 93

Hair, human, 29,65
He-Ne Lasers, 69
Histology, 259
History of science, 23
"Holey-polar", 61, 63
Hotstage, 100

Identification of particles 1, 148
INTER/MICRO-84, 163
Interference microscopy, 1, 58, 69
Interference objective, 1
Interference,Jamin-Lebedeff system, 58

Light microscopy, 23, 93, 123, 133, 141, 151, 219, 259, 277
Lipid, 133
Liquid crystals, 58
Lyotropic mesophases, 58

Mach-Zehnder interferometer 69
Measurement, 11, 58, 63,69
Metallography, 219
Micrarium (Buxton), 57
Microchemistry, 141
Micrometry, 83

Microspectrophotometry, 11
Mounting media, 133, 259, 277

Nigerian cements, 265
Nomarski DIC, 63

One-Hundred years ago, 82
Optical contrast, 133
Optical images, filtering, 119

Particle identification, 1, 148
Particle recovery from aroclor, 148
PCBs, 148, 277
Peanut, 83
Photomacrography, 219
Photomicrography, 219
Plant tissue, 83, 133
Plastic embedding, 83
Pleurosigma angulatum, 151
Polychlorinated biphenyls, 148, 277
Portland cement, 265

Resolving power, 93
Rubeanic acid, 141

Sample preparation, 83, 133
Scanning electron microscopy, 151, 265
Seed tissue, 83
SEM, 151, 265
Slide-ringing, 259
Stage, tilting, 1
Stain-mountant, 133
Starch, 123, 133

Temperature coefficient of refractive index, 63
Thin-sections, 23
Thomson, Allen, 23
Tilting stage, 1
Topography, 1
"Tricks of the Trade", 100, 148
TV microscopy, 273

Vapor staining, 133
Video microscopy, 273

Wood, 23

The Microscope

AUTHOR INDEX

Volume 32

BENKO, JAMES J.: Add video to your microscope, 273

CLARKE, THEODORE M.: Method for calculating relative apertures for optimizing diffraction-limited depth of field in photomacrography, 219

FLINT, OLGA: Applications of light microscopy in food analysis, 133

GERAKARIS, JAMES G.: Slide ringing revisited, 259

GRAVÉ, E.V.: see Rochow, T. G. and Barbara H. Grimes, 151

GRIMES, BARBARA H.: see Rochow, T.G. and E.V. Gravé, 151

HARTSHORNE, A. W. and D.K. LAING: The measurement of birefringence on single fibres using a microscope-mounted spectrophotometer, 11

LAING, D.K.: see Hartshorne, A.W., 11

LOCKE, JOHN: New developments in the forensic examination of glass, 1

LOW, A.D. MORRISON and R.H. NUTTALL: A note on early fossil wood sections from the Allen Thomson Collection, 23

McCRONE, WALTER C.: INTER/MICRO-84, 163

McCRONE, WALTER C.: Use of aroclors in microscopy, 277

McCRONE, WALTER C.: Cornell microscopy - a report, 289

NUTTALL, R.H.: see Low, A.D. Morrison, 23

PEARCE, T. H.: Multiple frequency laser interference microscopy: A new technique, 69

ROCHOW, T.G., BARBARA H. GRIMES and E. V. GRAVÉ: Scanning electron microscopy of Pleurosigma angulatum (Quekett) for resolution of detail and quality of image, 151

SARKAR, S. L.: Further microstructural information on Nigerian clinkers from SEM study, 265

STRAUSS, MARY ANN T.: A case report: The hairs

tell the truth, 29

VINEY C.: Ultimate optical resolving power when conoscopic image contains no zero- or even-order maxima, 93

WILLS, WILLIAM F., JR.: Detection of various metals using gelatin films sensitized with rubeanic acid, 141

YAHL, KENNETH R.: Starch pasting for industrial applications and some problems, 123

YATSU, LAWRENCE Y.: Plastic embeddment of dry-processed seed tissue, 83
